Mr. Bradley Poston  
Idaho Operations  
U.S. Department of Energy  
1955 Fremont Avenue  
Idaho Falls, ID 83415

Dear Mr. Poston:

I am writing in support of the application (DE-FOA-0000065) submitted by Michael Brace / EV World.com, LLC for Project SlowFlo.

This project seeks to offer a hydrokinetic energy solution as a viable form of generating electricity using alternative energy on a national scale. Hydro-kinetically Powered Electrical Generators (HyPEGs) are a new concept design for hydrokinetic electrical generation which converts water currents into power. Such a generator is designed to operate in unimpeded currents. The design of the components were specifically scaled to allow for the incremental placement of multiple HyPEGs in-line and side-by-side of existing, onshore coal-fired power plants. HyPEGs do not require any additional grid improvements and will allow coal-fired plants to lower their carbon emissions.

Please give the application submitted for Project SlowFlo your most serious consideration. If you have any questions, please contact me or Matt Stevens in my Fort Mitchell, Kentucky, District Office at (859) 426-0080.

Sincerely,

Geoff Davis  
Member of Congress
